

# BASIC CONFIGURATION SERVICES

ANYTHING BUT BASIC

## Get Your Projects in Gear Faster with Basic Configuration Services from Access Networks

### WHAT IT IS

Basic Configurations Services offer a pre-configured network solution for your small-to-medium projects that streamlines and simplifies the installation process by providing the networking products you need, ready to rock-n-roll out of the box.

With Basic Configuration Services, you own all the passwords, configurations, and management once the products have been installed and commissioned.

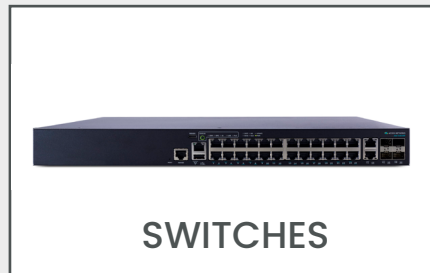

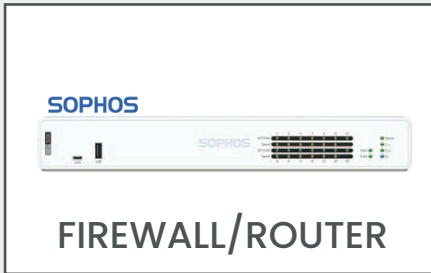

### HOW IT WORKS

- Select items to make a complete network or a standalone solution from any category on the [MyAccess Partner Portal](#)
- Submit the order and provide your unique project configuration data
- Wait for your goodies - your order will ship within 2 business days of receiving the configuration data
- Easily install the network - all configured products will work out of the box. You may make any changes needed after deployment or [contact our Technical Services team](#) for assistance

### WHY YOU NEED IT

- The ideal solution for small-to-medium size networks
- High-performance networking products customized to your specs
- Time saved on install with products ready to rock-n-roll out of the box
- Business profitability with repeatable configuration structure
- Maintain complete control of network settings and admin credentials
- Configuration only service option with less complexity than [Core Systems](#)
- All products include our [standard support and product warranty](#)
