Core and Core Wireless network solutions are just that:  
*the central and most important part of a connected environment.*

## All Core Systems Include:

### Customized Network Designed to Your Specifications

Both the wireless only and complete Core Network options come designed and pre-configured by our team to create a reliable network plan for your project

### Lifetime Access Networks Support

Every Core Network includes access to our support team for any need or questions during installation and beyond

### Advanced Hardware Replacement Warranty

We offer the best enterprise-grade networking solutions possible and guarantee they will support the space and its network efficiently

## Available with ARCC Cloud-Based Network Controller

ARCC is an award-winning cloud-based solution to remotely deploy and manage wireless systems. Create efficiency, save time, and simplify service with the ARCC Advantage!

## Design Services Included

Our industry leading design process is included, all Core and Core Wireless Networks will go through a design review before fulfillment is complete.

# Core Network Options

Which Core Network is Right for You?

## CORE

Core includes both the **wired and wireless** portion of your project. By submitting a design request to share the details of your project, our team will provide a complete network solution based on your specifications and our proven methodology.

### FEATURES INCLUDE:

- ARCC Cloud-Based Controller
- Access Points of Your Choice
- ANX7150 Primary Switch
- Sophos XGS Firewall (Router)
- Access Networks Live Monitoring
- Access Networks Premium Support

## CORE WIRELESS

Core Wireless is a turn-key **wireless only** system that we design, configure and ship to you. Connect to a router and switch of your choice to efficiently complete a robust network for your client.

### FEATURES INCLUDE:

- ARCC Cloud-Based Controller
- Access Points of Your Choice
- Access Networks Premium Support

## Complete Your System

By adding Access Networks access points and additional switches of your choice.

## Cloud-Based Wireless Network Controller

ARCC is Access Networks' award winning cloud-based solution to deploy and manage your client's wireless systems. ARCC delivers a new level of simplicity during deployment, a higher level of control with more tools to customize each job and a lower cost of entry for industry leading capabilities.

ARCC, a cloud-based wireless controller, is available with our custom engineered Core Networks or as a service that can be added to your access point purchases. Either way, you will experience the ARCC Advantage.

### The ARCC Advantage

#### Create Efficiency

Scale your business by being more efficient, ARCC simplifies the process from installation and deployment to remote management

#### Save Time

ARCC can be configured prior to installation and will start working as soon as the router, switch and access points are connected and online

#### Streamline & Customize

Your ARCC domain will include Access Networks' preconfigured templates that can be repeated for consistency or customized to suit your clients' needs

#### Offer Scalability

ARCC can start small and easily ramp-up to support any possible network additions in the future

#### Service Anywhere

Access, configure and troubleshoot any wireless system with a computer or mobile device from anywhere in the connected world

#### Build Revenue

ARCC offers a lower cost of entry for industry leading features and provides recurring revenue opportunity
